### **DETAILED ACTION**

1. In view of the Appeal Brief filed on 9/5/2002, PROSECUTION IS HEREBY REOPENED. The Action set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. Claims 1-22 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

Art Unit: 2155

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-7, 10, 12-17 and 22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by French et al US pat. No.6,442,685.

As to claim 1, French discloses the steps of:

receiving a request for a function (i.e., user interactions), wherein the request comprises an input specifying a server name, wherein the server responds to requests directed to a set of server names, and executing the function in a server name context on the server as directed by the input specifying the server name (see abstract, figs.1, 3, 5, col.5 line 12 to col.6 line 47, col.7 line 12 to col.8 line 63).

As to claim 2, French discloses a set of resources (server name tables) associated with a server name (see col.7 line 12 to col.8 line 63).

As to claim 3, French discloses identifying a membership of a resource within the set of resources for the server name context (see col.7 line 12 to col.8 line 63 and col.9 line 53 to col.10 line 54).

As to claim 4, French discloses generating a server name tag for the server name, wherein the membership of the resource in the set of resources is identifiable by the server name tag associatively stored with the resource (see col.9 line 53 to col.10 line 54 and col.11 lines 3 -67).

Art Unit: 2155

As to claim 5, French discloses the server name tag is generated based on a value of the server name and a value derived from a data structure that stores the server name (see col.9 line 53 to col.10 line 54 and col.11 lines 3 -67).

As to claim 6, French discloses the value derived from the data structure is a position value of the server name within a server name table that stores the set of server names (see col.7 line 12 to col.8 line 63 and col.9 line 53 to col.10 line 54).

As to claim 7, French discloses the request for the function is received from a network (see fig1).

As to claim 10, French discloses repeatedly identifying a plurality of resources that are applicable to the server name by searching plurality of resource data structures for matching server name masks (see col.7 line 12 to col.8 line 63 and col.9 line 53 to col.10 line 54).

Claims 12-17 are rejected for the same reasons set forth in claims 1-6 respectively.

Claims 21 and 22 are rejected for the same reasons set forth in claims 1 and 2 respectively.

Art Unit: 2155

***Allowable Subject Matter***

5. Claims 8, 9, 11 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Other prior art cited***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
